# PROOF OF PUBLICATION

STATE OF UTAH, )  
COUNTY OF UTAH, ) ss.

I, John Serfustini

being first duly sworn, depose and say that I am the \_\_\_\_\_

~~managing editor~~ of The Payson Chronicle, a week-  
ly newspaper of general circulation, published once each week at  
Payson, Utah, that the notice attached hereto and which is a  
Order to Show Cause No. 43-045-001

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

was published in said newspaper for one con-  
secutive issues, the first publication having been made on the  
19th day of February, 1976, and the last  
on the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_, that said  
notice was published in the regular and entire issue of every number  
of the paper during the period and times of publication, and the same  
was published in the newspaper proper and not in any supplement.

John Serfustini

Subscribed and sworn to before me this 11th day of  
March, 1976

John B. Crump  
Notary Public

My commission expires 4-13, 1978.

c) The seeding, planting, or otherwise necessary revegetating will be performed on the berms upon abandonment and, on the mill site when operations have permanently ceased. Plant species to be used are those specified in the reclamation plan.

d) Sufficient fertilizer will be utilized in conjunction with plantings; dictated by soil analysis.

Five years from the final approval of the notice of intent, berms will be evaluated by the Division for the presence of plant support materials (soils). If this evaluation proves that no soil is present on the berms, the operator will spread 4 to 6 inches of soil available from alluvial or colluvial deposits on adjoining claims onto the berms. When the supply of available soil is depleted, as determined by the Division, no further soil spreading will be required.

Before final abandonment, maximum residual slope for bare rock will be 100% (45 deg.). Reject or soil piles will be graded to 30% (17 deg.)

or less prior to final abandonment, if any such piles are left. A sign will be placed at the mine stating the mine location, operator, and operator's address.

Any person or agency aggrieved by this tentative decision is hereby requested to submit written protest to the Division of Oil, Gas, and Mining, located at 1588 West North Temple, Salt Lake City, Utah 84116, setting forth factual reasons for his complaint, and thereafter, at a

time and place heretofore established, appear before the Board of Oil, Gas, and Mining to show cause, if any there be, why this plan should not be approved.

DATED this 9th day of February, 1976.

STATE OF UTAH  
BOARD OF OIL, GAS, AND  
MINING

SCHEREE WILCOX  
Secretary to the Board

Chronicle February 19, 1976.

## PUBLIC NOTICE

IN THE MATTER OF THE  
APPROVAL OF THE NOTICE  
OF INTENT AND RE-  
CLAMATION PLAN SUB-  
MITTED BY R. D. M.  
& S. PARTNERSHIP, WHITE-  
ROCK CLAIMS, TOOELE AND  
UTAH COUNTIES, UTAH.

ORDER TO SHOW CAUSE  
NO. 43-045-001

THE STATE OF UTAH TO  
ALL PERSONS INTERESTED  
IN SECTIONS 33 and 34,  
TOWNSHIP 8 SOUTH, RANGE  
3 WEST, SLBM, TOOELE AND  
UTAH COUNTIES, UTAH.

Notice is hereby given that tentative approval has been given by the Utah Division of Oil, Gas, and Mining to R. D. M. & S. partnership, P. O. Box 314, Orem, Utah, 84057, to conduct a surface limestone mining and milling operation on the Whiterock group of claims, numbered 1 to 10, Sections 33 and 34, Township 8 South, Range 3 West, SLBM, Tooele and Utah Counties, Utah. R.D.M. & S. partnership is represented by Mr. Jack Madsen of Provo, Utah. Other partners include: Mr. Darrel L. Ross, Provo, Utah; Mr. H. Clyde Davis, Orem, Utah; and Mr. Lynn Stewart, Stillwater, Oklahoma. The proposed mine is unnamed.

R. D. M. & S. partnership has fulfilled all obligations under the Mined Land Reclamation Act of 1975 (Section 40-8) Utah Code Annotated, 1953, as amended, and tentative approval has been given to conduct surface limestone mining and milling operations with the following procedures:

a) High-grade limestone from the Mississippian Gardison and Mississippian Fitchville Formations will be drilled, blasted, removed, and milled throughout a period of 30 to 50 continuous years. Limestone will be removed from the surface of a dip slope to a stratigraphic depth of 90 feet during this period. Surface soils from the mined slope will be retained if practical. Soil and reject materials will be segregated in separate piles. A site map of the mine is on file with the Division.

b) The residual slope after mining will be left along the natural dip of the formation. The operator will have caused to be made, berms, at least 20 feet in horizontal width located every 200 feet along the slope distance. Said berms shall be of consolidated material as well as a part of the natural formation and shall follow the existing contour at the same elevation.
